The X-ncubator is a small business incubator for Xavier students. It is an innovative educational learning laboratory that is designed to inspire and educate students interested in entrepreneurship and small business. As a participant, student business owners plan and launch their business ideas with the assistance of business professionals and Xavier faculty.

It features desktop pcs that are networked to a printer and copier, formal and informal meeting areas, business publications such as Inc., Entrepreneur, and Fortune, and a tv. The monthly Entrepreneurship Café meetings between students and business professionals also occur here.

It truly is a place where entrepreneurs can mingle among themselves, nurture their ideas and support each other.
