

AFTER ACCEPTANCE TO XAVIER

It is recommended that students expedite travel and passport procedures well in advance of the intended date of departure to the United States. After being admitted to the University, eligible students will be issued the **Certificate of Eligibility (Form I-20)** as required by the U.S. Citizenship and Immigration Service (USCIS). Applicants who have a valid "**Green Card**" or who are "**Naturalized Citizens**" do not need the **Certificate of Eligibility (Form I-20)**. For information about student Visas and required SEVIS fees, refer to the website at <http://travel.state.gov/content/travel/en.html> Information on orientation and registration at Xavier will be sent to all admitted students. It is advisable for students to begin their course of study during the Fall semester in order that they may take required courses in proper sequence. Xavier University offers further information for international students through our [Center for Intercultural and International Programs](#).

There are two mandatory requirements that you must complete and submit to Student Health Service prior to registration – 1) Health Clearance and 2) Insurance Information. Each new student must submit the health forms required by the Xavier University Health Services Office [Immunization Compliance & Consent for Care Forms](#). All undergraduate students are required to carry an insurance which provides coverage for physicians and emergency rooms in the New Orleans area. Information about the student health insurance requirement is located on the [Student Health Services web page](#).

Students admitted into the Doctor of Pharmacy (*PharmD*) program should check the College of Pharmacy's web page for any additional requirements for international students or E-mail the College of Pharmacy at applyxucop@xula.edu.
